Address

Dumaguete, Philippines

Education

Negros Oriental State University
2013-2017

BS in Geology

Tech Stacks

Programming Languages:

C, C++, JavaScript, TypeScript, Python

Frontend:

Vue.js, Nuxt.js, React.js, Next.js, Vuetify, PrimeVue, Nuxt UI, Tailwind CSS, Zustand

Backend & APIs:

Node.js, FastAPI, REST, SOAP

AI / Data:

LLM Integration (OpenAI, Anthropic), YOLO (Ultralytics), Roboflow, RAG

Cloud & DevOps:

Docker, AWS, Vercel

Tools & Collaboration:

Git, Perforce, JIRA, Confluence, Trello, Notion, Gitlab, Github

Language

English (Fluent)

German (A2)

Filipino (Native)

Jorge Gabriel Adrian M. Adanza

Full Stack Software Engineer

Full Stack Software Engineer with 3+ years of experience spanning embedded systems, modern web development, and AI-integrated applications. Skilled in building scalable fullstack solutions using Next.js, Node.js, and TypeScript, with experience integrating LLM-driven features and developing end-to-end systems. Proven ability to work across the stack in fast-paced environments, delivering reliable, high-performance, and maintainable software.

Experience

MAVR LAB PTE LTD

Mar 2026 - Present

Full Stack Software Engineer (Next.js / Node.js) - Remote

- Developing and maintaining a full-stack web application using Next.js, Node.js, and TypeScript, focusing on scalability, performance, and seamless user experience
- Building server-rendered and API-driven features to support dynamic, real-time application behavior
- Integrating AI-driven capabilities using modern LLM platforms while maintaining abstraction and system flexibility
- Implementing state management and responsive UI using Zustand and Tailwind CSS
- Utilizing Payload CMS for role-based access control (RBAC) and system configuration, with ongoing improvements toward more advanced data retrieval architectures
- Deploying and managing containerized services using Docker and AWS infrastructure

MILLER SOLUTIONS DEVELOPMENT INC.

Jun 2024 - Mar 2026

Software Developer - Hybrid

- Developed and delivered client-facing web applications using Vue.js, Nuxt.js, and modern UI frameworks (Vuetify, PrimeVue, Nuxt UI)
- Built and integrated RESTful APIs to support efficient frontend-backend communication
- Designed and implemented an end-to-end object detection pipeline using Python and YOLO-based models for automated image processing
- Developed a FastAPI backend to expose scalable AI inference services
- Managed source control and collaborated across multiple projects using Git and Trello in a fast-paced environment

KYOCERA DOCUMENT SOLUTIONS DEVELOPEMENT INC.

Mar 2023 - May 2024

Software Engineer - Hybrid

- Developed and maintained C/C++ firmware components for embedded printer systems, improving system reliability and device functionality
- Integrated SOAP-based services to enable communication between embedded devices and external platforms
- Debugged and validated firmware across simulators, virtual environments, and physical hardware
- Managed code integration and version control using Perforce in a multi-developer environment
- Collaborated with cross-functional teams using JIRA and Confluence for task tracking and technical documentation
- Performed remote debugging, build management, and system troubleshooting
